THE MAINTENANCE BLDG. that houses The University police station was the scene of an electrical explosion that paralyzed the local power supply Tuesday afternoon.

Photos by Dave Otney

Campus Power Cut By Explosion, Fire

University buildings operated on reduced power supplies yesterday after an explosion caused a blackout in most buildings Tuesday afternoon.

The University had its blackout when a power transformer, located in the Maintenance Bldg., exploded. The explosion knocked out the central power supply unit of the campus, paralyzing most University activities.

The Administration Bldg. and other University buildings minus air conditioning and light sources, quickly became uncomfortable on a summer afternoon.

F. Eugene Beatty, University director of buildings and facilities, said it was fortunate that the damage was no greater. "If the circuit breakers had not held, we would have lost all of our switching gear, and would have been without power for 6 to 10 months." The delivery time for just one of the \$8,000 switching units is about six months, he explained.

Mr. Beatty attributed the explosion to an intensive heat build-up in the communications tunnels and in the transformer rooms in the Maintenance Bldg. Also cited as contributing factors were the condensation build-up in both these areas and the general overload of the system.

"The underground tunnel that carries the cables from the city power supply on Wooster Street to our transformers does not allow dissipation of heat like overhead lines do," Mr. Beatty explained.

At the time of the explosion there were about 20 persons in the Maintenance Bldg., but no one was injured.

There's no official estimate of the damage of yet but it is thought to be in the vicinity of \$15,000 to \$20,000.

The electrical fire was aggravated when transformer oil was ignited. Firemen had the blaze under control at 2:42 p.m., but an hour after the first explosion. And then the chore of cleaning up and restoring power began.

Gasoline generators were used to provide essential power to the dormitories and food storage facilities.

EQUIPMENT in hand, Lt. William Fursdon of The Bowling Green Fire Dept. sighs with heat at explosion Tuesday.

ities. Paper plates were the style in most university dining halls.

The mishap caught people in strange circumstances. One poor fellow was in the midst of a haircut at the Union when the power failed. The barber couldn't complete the haircut. A United Parcel Post employee had just made a package delivery to the eighth floor of the Administration Bldg. and was returning to the ground floor when the power went off. Maintenance employees rescued him moments later from between the third and fourth floors.

University office personnel were sent home at 4:15 p.m.

Some classes continued without lights and others moved outdoors. Auxiliary power units were pressed into service in the Student Health Center, the Library, and Life Science Bldg.

The University radio and television stations were forced off the air, and operation of the campus computer center, housed in the Administration Bldg. and needing accurate temperature control, was halted.

Other buildings that were paralyzed by the failure were the Library and the Ice Arena, with melting ice.

Although the power was restored on a restricted basis for yesterday's classes there were still sporadic blackouts. One student reported that the lights in his class at Hayes Hall when on and off five times in a two-hour period.

Utility men from Bowling Green city crews worked throughout the day yesterday to provide a substantial power source until permanent repair measures are taken.

Conway To Direct Branch Programs

Patrick M. Conway, assistant dean of men, has been named director of student services for the University's new Firelands Branch, announced Dr. James H. McBride, branch director.

Conway, who will assume the newly-created post Sept. 1, also will be promoted to the campus rank of assistant dean of students.

The \$2.9 million, Firelands campus located on a 216 acre site is designed to provide residents of Ottawa, Erie, and Huron counties with the first two years

of college. The academic center is scheduled to be completed for the 1968-69 school year.

As director of student services, Conway will be responsible for coordinating a variety of student programs ranging from admissions to placement, finances, counseling, cultural and special programs.

In the coming year, he will help set up many of the programs which he will head after branch completion.

University Streamlines Name

The campus architecture is not the only thing that is being streamlined on campus.

In a policy decision by President William T. Jerome III, the word "state" is being deleted from the name of the University in all but the most official use.

The name change is not a legal conversion because the original statute that denotes the Bowling Green Normal College would have to be changed. President Jerome said he didn't have any intentions of attempting a statute change.

The change is a policy decision which first took roots in the August-September, 1965 edition of what is known now as Bowling Green University Magazine. All but two of the 10 regular university publications and approximately 24 pamphlets have deleted the word state.

All news releases sent from the University omit the word. The

only releases that maintain the "state" are those issued by the athletic department.

Dr. Jerome, commenting on the change said the name Bowling Green University, conveys a bounce in its sound. He also stated that he wanted a University with class and we'll see what happens.

In explaining the unofficial change of the school's name Dr. Jerome said that when he came here four years ago every publication used Bowling Green State University. He continued and stated that it was a big long name. It was hard to use.

"On the eastern seaboard, added Jerome, where I come from, BGSU is not known. State Universities have no appeal there; they don't have a dynamic image. Bowling Green is just not known around the country. I want it to be."

Before the switch was made,

Dr. Jerome took the matter before the long-range planning committee, which wanted the name changed legally.

It was reported that James Hof, director of University relations, said he would like to see even the "University" removed.

Mr. Hof said that it would be nice to be known as just "Bowling Green." He added that people don't say Princeton University, it's just Princeton.

The Alumni News and the Bulletin are the only two publications that still use the word state. The Bulletin lists the classes and explains University policy, being considered an official publication, according to Ann Clark, administrative assistant in the publications office.

The current Bulletin, on page five, reads "Bowling Green University is a 'state-assisted' institution. Several years ago it read, "Bowling Green State University

is a 'state-supported' institution."

The alumni publication retains the word state because the alumni like it, according to James Hof, who is also director of alumni relations.

News media receiving University news releases must make the decision of whether to print the name as is, or inject the word state. About 60 per cent of the news media leave the word out, Cliff Boutelle, university news director, said.

For the first time in the 46-year history of the Key, the University yearbook, the word state was removed from the cover.

Limited controversy has occurred over the omission of the word state.

A sign on the east side of Bowling Green, on Wooster St., announces, "the home of Bowling Green University." The sign was paid for by a group of commun-

ity organizations, although it is located on University property. Robert Hoagland, of the chamber of commerce said that Paul Moyer, representing the University Industries before the sign was erected, requested that the "state" be left out of the sign.

Since the sign was put up, Mr. Hoagland reports several calls about the sign. He told the callers that he had acted under the direction of the university.

One Bowling Green resident stated that the gripes he heard in the community usually concern the belief that the people are "losing their university."

CAP, GOWN

Candidates for August graduation are reminded to place their orders for cap and gown rental at the University Bookstore in the Union. No cash is needed at the time the measurements are taken.

Library Attempts Theft Prevention

There's something new at the new library. It's an electronic detection system that will make for an embarrassing exit for would-be thieves.

Each book in the library stacks has an magnetic plate on the inside of each book cover. When a book is withdrawn from the library in the conventional manner the magnet will be demagnetized allowing free passage through the electronic detection exits.

If the library book is filched, the plate will not be demagnetized. Unwary of the device, the thief will proceed through the exit to come to an abrupt halt. The gate will lock and a soft bell sounds throughout the ground floor vicinity and the wrath of embarrassment swallows him up.

The new system at the library, in an attempt to prevent thefts, will give rise to a new form of recreation. Instead of reading mystery books, students will turn to plotting against the machine. Some people are still trying to fool the police radar system by stuffing tin foil in their hub caps.

Here's an idea. Why not deliberately carry a magnet in your pocket. When the sensor picks it up and sets off the warning bell, just look confused and hold up the magnet to avoid suspicion. Then, walk out of the library with an inflated ego as clerk mutters "freshman" and turns off the detection device.

Send all ideas to the library in a plain, unmarked envelope, and prove to the library staff that the machine age will not take the place of creativity.

Vogt To Head Planning Office

The University's newly reorganized institutional studies and planning office will be headed by Dr. Karl E. Vogt, Bowling Green University President William T. Jerome III has announced.

Dr. Vogt, a labor-management relations specialist, most recently was chairman of the organization and management department at Syracuse University. He succeeds Dr. Donald C. Lelong, who joined the staff of the University of Michigan.

The institutional studies and planning office will assist all organizational areas of the University in planning future needs and operations. The office will also help to coordinate all area plans with over-all long-range objectives of the University and develop an automated system of key information needed for decision making.

Dr. Vogt, a native of Boston, was graduated from Holy Cross College in 1953. He received a master's degree in 1957 and doctoral degree in 1961, both from Syracuse University.

The 37-year-old administrator formerly headed a project to establish a college of business administration in Colombia, South America, from 1965 to 1967. The project was supported by Syracuse University and A. I. D. (Agency for International Development).

NEW EXPERIENCE for Betty Grohoske of Findlay as she confers with mom about her academic future at the University. Summer pre-registration begun this week and will continue through August 25. There are 2900 students participating in pre-registration who will enter the University this fall. The incoming freshmen are divided into groups of 300 who with their parents will attend one of 20 overnight pre-registration sessions to acquaint themselves with the University and to take care of registration formalities.

Biology Students Tour Western U.S.

Thirty biology students from the University are currently on a five-week field trip through the western United States.

The group under the direction of Dr. Gerald Acker, associate professor of biology, will have the opportunity for intensive study in the field biology and ecology.

The participants in the study survey will spend most of their time at Gold Creek, Nev. The annual trip sponsored by the biology department will end Aug. 25.

Dr. Acker said the variations in western topography offer an excellent opportunity to study the diversified biological spectrum.

Students will not only learn basic identification of plants and animals, but also will study such field techniques as trapping and preparation of mammal skins, mapping, and analysis of animal and plant populations.

The students participating on the trip are Richard Carrick, Robert Jones, Mr. and Mrs. Cornelius Laban, advisers, Stephen Shaffer, Steve Thompson, and James Violet, all of Bowling Green.

MOUNTAIN VIEW Calif. (UPI) -- The counterweight and carriage of what is expected to become the world's most powerful man-carrying centrifuge have been assembled at the Ames Research Center here.

Built by Conesco, Inc. of San Leandro, the unit weighs nearly 300 tons and will support a 50-foot arm. At the end of the arm will be mounted man-carrying capsules.

The \$6.5 million centrifuge will be the only known device capable of simulating all expected forces and motions for lunar and planetary launch and re-entry except weightlessness.

'South Pacific' At Huron Playhouse

By Harry Schwarzer

If you have reserved tickets for South Pacific, cross your fingers before the curtain opens. The Huron company made an attempt at the Rodgers and Hammerstein musical Tuesday evening, and will still be trying through Saturday.

One must realize the major

difficulties involved when a small summer theater undertakes a grandiose old favorite like "South Pacific."

Nevertheless, actors who cannot sing, singers who cannot act, poor choreography and a general lack of spontaneity forced a dress rehearsal atmosphere on an opening night capacity crowd.

But the audience loved every minute.

John Myers and Judy Barteau, the romantic leads, worked well when together. John as Emile de Becque is an actor par excellence, but he cannot sing. Miss Barteau projected incongruently.

Most of the individual characterizations were good. Outstanding once again is Tracy Davis as Billis. He walked off with the honors, almost all of them. Lorelle Brownell plays Bloody Mary, an ugly Tonkinese woman with harsh, vigorous accuracy. Mary Cooper is both lovely and moving as her tragic daughter Liat. The make-up of both women is a tribute to the skilled Robin Charin.

"Younger Than Springtime," sung by Mike Dundas, was the only song sung as a song should be sung. Dundas and Liat characterize their tragic role beautifully. Individual scenes were done well, excluding the opening choreography of act two which was amateurish. It is too bad they didn't fit together. Nancy Barrett's quick scene changes pulled them helped pull them together.

The scenery by John Hepler worked well with the large company on Huron's small stage. His island settings with a minimum of ornamental nonsense maintained the traditional Hepler functionality.

If you are planning to see "South Pacific", you might better wait until Saturday, or wait for the movie.

Staffers Needed

All frustrated journalists and authors are cordially invited to test their talents with the B-G News. We need reporters and feature writers. Great experience. No pay. Come to the B-G News Office for information.

King To Speak At Toledo School

Dr. Martin Luther King, Jr., controversial national civil rights leader and winner of the 1964 Nobel Peace Prize, will speak at the Scott High School fieldhouse July 29 in Toledo.

Dr. King will be sponsored by the recently formed Toledo chapter of the Southern Christian Leadership Conference (SCLC).

The civil rights leader who has recently voiced opposition to the war in Viet Nam, was awarded the peace prize in 1964 in Oslo, Norway.

Art Class 'Thinks Big'

LIFE SIZE hexagonal boxes add a 'Something New' touch to the library patio. The boxes were designed by art department students.

By Bill Diamond
Staff Writer

"Happiness is a hexagonal box." This was the claim of Michael Lee Johnson, sophomore in the College of Liberal Arts, referring to art projects that are currently on display on the patio of the new library.

The projects, built by the students of Design 112, are models of geometric shape built to human scale. The idea involved was to get away from tiny projects and think big.

"When you begin to work in larger scale, it begins to have more meaning to it," said Carl D. Hall, assistant professor of art. "The addition of color to the finished product either accentuated the design or in some cases, detracted from it," said Mr. Hall.

The cost of the project for the entire class was \$120 for materials and paint.

The figures were made of "easy curve" (a type of hard cardboard) or of masonite. Carefully fit together and sanded, the final form had an "aesthetic, decorative, geometric hard-edged quality," added Mr. Hall.

The assignment could not have been carried out during the regular school session because of the space involved in the construction of the projects in the hall and in the classroom itself.

This session is the first time that Design 112 has been offered during the summer.

"Most of the student's artforms may be considered as a model for something larger and could always be improved. I think the project was a success, and almost without exception, the faculty of the art department thought highly of the works. The students were also pleased with the results," concluded Mr. Hall.

Mr. Hall said the art forms will remain in the gallery until the end of the second session.

Mary Lynne Spaude, junior in the College of Liberal Arts: "I enjoyed the project. I didn't think we could do it the way they turned out. Everybody was covered with plaster and sawdust, and then everything came out so neat and clean in the end."

Judy Oldfield, freshman in the College of Education: "Mr. Hall gave us a chance to do something that the art department had never done before as a group."

Claudia Jean Smith, sophomore in the College of Education: "My dad got to make all the big things; I never got to do the carpentry work before. I never did anything that big."

Alesa A. La Valle, junior in the College of Education: "I liked it. It brought the whole class together. I think that now I can get a job as a construction worker at the end of the summer."

IM Notes

Late entries for the second session slow-pitch softball league (men and women), and the three-man basketball league will be accepted no later than 5 p.m. today. Entries are available from dormitory athletic chairmen, counselors and the Intramural office, 201 Memorial Hall.

Dormitory intramural chairman for the second session are Rick Poland, 226 Harshman A; Rich Cooley, 100 Harshman B; Pam Goldy, 202 Harshman C; and Cheryl Elsass, 106 Harshman D.

Entries are now available from athletic chairmen and counselors for tennis doubles (men and women), two-man golf and paddleball tournaments. Entries will be due Aug. 2 in the Intramural Office.

Newman Receives Research Grant

Dr. David S. Newman, assistant professor of chemistry at the University, has received a \$2,250 research grant from Research Corporation. The grant-in-aid will be used for Dr. Newman's program on "Hall Effect in Ionic Solutions."

He will be examining the structure of ionic solutions by measuring ionic Hall effect in solutions and later in fused salts.

A University faculty member for the past two years, Dr. Newman received the bachelor of arts degree from Earlham College, the master of science degree from New York University, and the doctor of philosophy degree from the University of Pennsylvania.

6	Bulbs	0	5

BG To Host Jennings Series

Bowling Green has been chosen as one of three Ohio universities to host the Jennings Scholar Lecture Series in the 1967-68 academic year.

The series, financed by the Martha Holden Jennings Foundation, is designed to expose outstanding teachers to controversial issues on a wide range of subjects.

Up to 350 teachers will be accepted to participate in the seminars. They will be nominated by their respective school districts and each will receive a \$50 stipend for attending the series. The participants also will be honored with a certificate designating them as "Jennings Teacher-Scholars."

The teachers will attend six Saturday seminars consisting of a lecture and question-and-answer period. Speakers, recognized as experts in their fields, will give the lectures.

Kent State University and Ohio University are the other universities selected to sponsor the lecture series.

Dr. Robert Beynon, director of the College of Education's office of development and research, is coordinating the lecture series seminars.

New Archivist Joins Staff

A former Library of Congress staff member has been appointed Bowling Green University's first archivist.

Stephen C. Morton, 28, also will be in charge of the University's rare books collection, according to Dr. A. Robert Rogers, library director.

Mr. Morton will develop a system of keeping and organizing all University records and documents which have permanent value.

As rare books librarian, he will be in charge of acquiring old and valuable volumes, based on their usefulness for instruction and research.

A 1960 Bowling Green graduate, Mr. Morton worked in the Presidential Papers section of the Library of Congress from 1961 to 1964, while attending American University in Washington. He received his master's degree from American University in 1964.

Prior to joining the University staff, he was employed in the Maryland and rare book room of the McKeldin Library at the University of Maryland, where he has been studying for his doctoral degree.

Dr. Buford To Lecture Tonight

Dr. Joseph C. Buford, chairman of the University geology department, will discuss "The West that was Won" at 7:30 tonight in 105 Hanna Hall.

His free, public lecture, part of

the offerings of the summer school social calendar, will deal with the cultural and physical features of the western United States with emphasis on the Rocky Mountains. He also will show colored slides of the West.
